These records and accounts shall be kept for a minimum of two years after livestock were purchased for resale. The commissioner or the commissioner's employees or agents may examine the records and accounts during normal working hours.

(b) After notice and hearing in accordance with the provisions of the Kansas administrative procedure act, the commissioner may deny any application for registration or suspend or revoke any registration in force, if formal findings are made that the person has failed repeatedly to maintain records and accounts that are sufficient to allow the commissioner to trace animals back to the herd of origin, to the point of destination or both.

K.S.A. 47-1807. Penalties. Any person violating or failing to comply with the provisions of K.S.A. 47-1804 through 47-1808, and amendments thereto, shall be deemed guilty of a class A misdemeanor.

(b) The commissioner, after providing notice and opportunity for a hearing in accordance with the Kansas administrative procedure act, may assess a civil penalty against any person who violates or fails to comply with the requirements of this act, or any rules and regulations adopted hereunder, of not less than \$100 nor more than \$1,000 per violation. A separate civil penalty may be assessed for each separate violation. Such civil penalty may be assessed in addition to any other penalty provided by law.

History: L. 1984, ch. 194, § 4; L. 1990, ch. 193, § 3; July 1; L. 2012, ch. 125, § 38; July 1.

K.S.A. 47-1808. Bonding of livestock dealers; exceptions; amount of bond; who bond benefits; additional bond may be required; attorney fees assessed as costs in certain actions; penalties. (a) Except if bonded under the packers and stockyards act, 1921, as amended and supplemented, 7 U.S.C. 181 et seq., every livestock dealer required to be registered pursuant to K.S.A. 47-1805, and amendments thereto, upon notification by the animal health commissioner of the amount of bond required, shall file with the animal health commissioner a bond with good corporate surety qualified under the laws of the state of Kansas in a sum computed by dividing the dollar value of livestock sold during the preceding business year, or the substantial part of that business year, in which the livestock dealer did business, by the actual number of days on which livestock was sold. The divisor, the number of days on which livestock was sold, shall not exceed 130. The amount of bond coverage must be the next multiple of \$5,000 above the amount so determined. When the computation exceeds \$75,000, the amount of bond coverage need not exceed \$75,000 plus 10% of the excess over \$75,000, raised to the next \$5,000 multiple. In cases where a business operation is being commenced, an estimated amount of business to be transacted during the next 12 months may be used subject to adjustment later, if indicated. In no event shall the bond be for an amount less than \$10,000.

(b) The bond shall be in favor of the state of Kansas for the benefit of all persons interested, their legal representatives, attorneys or assigns and shall be conditioned on the faithful performance of all the registrant's duties as a livestock dealer. Any person injured by the breach of any obligation of the livestock dealer may commence suit on the bond in any court of competent jurisdiction to recover damages that the person has sustained, but any suit commenced shall either be a class action or shall join as parties plaintiff or parties defendant or other persons who may be affected by such suit on the bond. No bond shall be canceled by the surety on less than 30 days' notice by mail to the animal health commissioner and the principal except that no such notice shall be required for cancellation of any bond by reason of nonpayment of the premium thereon. The liability of the surety on the bond may continue for each successive registration period the bond covers. The total liability of the surety shall be limited to the amount stated on the current bond or on an appropriate rider or endorsement to the current bond. It is the intent of this statute that the bonds be nonaccumulative, that stacking of bonds not occur in excess of the face value of the current bond.

(c) Whenever the animal health commissioner determines that any bond given by any livestock dealer is inadequate and insufficient security against any loss that might arise under the terms of the bond, the animal health commissioner shall require any additional bond that the animal health commissioner considers necessary to provide adequate security. If the animal health commissioner considers the financial condition of the surety upon any livestock dealer and the livestock dealer's bond to be impaired, the animal health commissioner shall require any substituted or additional bond that the animal health commissioner considers necessary except this act shall not apply to those who buy livestock for others incidentally to their own farming operation.

(d) In all actions hereafter commenced in which judgment is rendered against any surety company on any surety bond furnished under the provisions of this section, if it appears from the evidence that the surety company has refused without just cause to pay the loss upon demand, the court shall allow the plaintiff a reasonable sum as attorney fees to be recovered and collected as a part of the costs. When a tender is made by the surety company before the commencement of the action in which judgment is rendered and the amount recovered is not in excess of the tender, no such costs shall be allowed.

(e) Any person violating or failing to comply with the provisions of this section shall be deemed guilty of a class A misdemeanor.

(f) This section shall be part of and supplemental to article 18 of chapter 47 of the Kansas Statutes Annotated, and amendments thereto.

Article 3.—SWINE BRUCELLOSIS AND CERVIDS

K.A.R. 9-3-1. Definitions. (1) Herd. A herd of swine shall include all swine on the premises of any owner of swine, or other person in possession, which swine are 6 months of age and over, exclusive of feeder swine maintained separate and apart from the swine kept for breeding purposes, and production therefrom.

(2) Negative herd test. A negative herd test means a test in which no agglutination titre exceeds a reaction of incomplete in the 1-100 dilution on the plate test or when no animal in the herd reacts on the brucella card test.

(3) Negative animal test. A negative animal test means a test in which the agglutination titre is negative in the 1-25 dilution on the plate test or negative on the brucella card test.

(4) Swine reactor. A swine reactor means any porcine animal showing a complete reaction in the 1-100 dilution of the blood agglutination test or complete agglutination on the brucella card test.

(5) Infected herd. An infected herd means any herd for which the herd test discloses one or more animals reacting completely in the dilution of 1:100 or higher on the plate test, then any animal in the herd showing a reaction of complete in dilution of 1:25, or higher shall be considered a reactor. Any animal in the herd reacting in the brucella card test. (Authorized by K.S.A. 47-608, 47-610, and 47-657; effective Jan. 1, 1966; amended Jan. 1, 1969.)

K.A.R. 9-3-2. Validated brucellosis-free swine herd. (1) Validation: A herd may be validated when the swine therein have passed one negative herd test. This includes all animals 6 months of age and over, with no agglutination tests being positive in the dilution of 1:100, or higher, on the plate test or no reactors on the brucella card test.

(2) Requirements for maintaining validated brucellosis-free herd: Annual herd blood test of all animals 6 months of age and over and herd additions limited to:

(a) Swine from validated herds, without a test, and

(b) Swine from herds where clinical evidence, or history, does not indicate infection, and which shall have passed a negative test within 30 days prior to herd addition. Such swine shall be held in isolation from herd to which they are intended as additions, until found to be negative to a retest 60 to 90 days from date of first test.

(3) Revalidation: Herd. A negative herd test of all eligible swine conducted within 10 to 14 months of the last validation date or establish that at least 20 percent of adult breeding swine were tested under a market swine identification program during the year and that at least one-half of sampling occurred during the last 6 months of the validation period.

(4) Revalidation: Area. Market swine identification coverage of at least 30 percent (10 percent per year) of the breeding swine 6 months of age or over from each herd, during the 3-year validation period. (Authorized by K.S.A. 47-608, 47-610, 47-657; effective Jan. 1, 1966; amended Jan. 1, 1969; amended Jan. 1, 1974.)

K.A.R. 9-3-3. Plans for eradicating brucellosis from infected swine herds. If infection is disclosed in swine herds, one of the following plans should be selected for eradicating the disease and for subsequent qualifying the herd for validated brucellosis-free status, if desired. Infected herds under test for area validation status should also choose one of these plans to eradicate brucellosis from the herd: A. Plan 1—This plan is recommended for commercial herds found infected. The following procedures should be carried out: (a) Market the entire herd for slaughter as soon as practicable.

(b) Clean and disinfect houses and equipment.

(c) Restock premises with animals (from validated brucellosis-free herds), placing them on ground that has been free of swine for at least 60 days.

(d) After 2 consecutive negative tests, not less than 60 nor more than 90 days apart, the herd is eligible for validated brucellosis-free herd status.

B. Plan 2—This plan is recommended for use in infected pure-bred herds only where it is desired to retain valuable blood lines. The following procedures should be carried out: (a) Separate pigs from sows at 42 days of age or younger and isolate.

(b) Market infected herd for slaughter as soon as practicable. Infected sows should not be rebred and should be slaughtered as soon as possible. Complete isolation of infected animals is essential. The separated weanling pigs form the nucleus for establishment of the infection-free herd.

(c) Test the gilts to be used for the following breeding season about 30 days before breeding. Save only the gilts that are negative. Breed only to negative boars.

(d) Retest the gilts after farrowing and before removing them from individual farrowing pens. Should reactors be found, they should be segregated from the remainder of the herd and slaughtered as soon as possible. Select only pigs from negative sows for breeding gilts.

(e) If reactors are found in step (d), the process is repeated.

(f) Following 2 consecutive negative tests, not less than 90 days apart, the herd is eligible for validated brucellosis-free herd status.

C. Plan 3—This plan is not recommended in general, but it has been found useful in herds where only a few reactors are found and where no clinical symptoms of brucellosis have been noted. Carry out the following procedures:

(a) Market reactors for slaughter.

(b) Retest herd at 30-day intervals, removing reactors for slaughter until the entire herd is negative.

(c) If the herd is not readily freed of infection, abandon this plan in favor of plan 1 or plan 2.

(d) Following 2 consecutive negative tests, not less than 90 days apart, the herd is eligible for validated brucellosis-free herd status. (Authorized by K.S.A. 47-608, 47-610, 47-657; effective Jan. 1, 1966; amended Jan. 1, 1974.)

K.A.R. 9-3-4. Official program work and reports. All official work shall be conducted by an authorized licensed, accredited veterinarian and the work shall be at the expense and liability of the swine owners, except fee-basis testing of swine is authorized in areas not validated brucellosis free and the testing shall be limited to suspicious and infected herds and area validation. Blood samples shall be tested at a state-federal cooperative laboratory. All testing shall be reported to the livestock commissioner on official brucellosis test charts and the reports shall show the date, name and address of the owner, the positive identification of the animal tested, and test results. (Authorized by K.S.A. 47-608, 47-610, 47-657; implementing K.S.A. 47-610; effective Jan. 1, 1966; amended Jan. 1, 1974; amended May 1, 1982.)

K.A.R. 9-3-5. Quarantine. When brucellosis is found in a herd, all swine on the premises where such disease is found, shall be under quarantine until released by the livestock sanitary commissioner of Kansas. Shipments to slaughter may be authorized by a shipping permit issued by the livestock sanitary commissioner of Kansas.

All swine moved to slaughter on a permit shall be identified in a manner approved by the livestock sanitary commissioner of Kansas. (Authorized by K.S.A. 47-608, 47-610, 47-657; effective Jan. 1, 1968.)

Each herd meeting the requirements of K.A.R. 9-3-15 shall advance one year in herd status for every year during which these requirements are met. Each participating herd with at least 10 years with no evidence of CWD shall be considered a CWD-clean herd. To maintain herd status as a CWD-clean herd, a herd shall receive animals only from other CWD-clean herds.

(c) Any owner of a herd in which all animals received have been moved directly from herds of a designated herd status within Kansas, or from a state with a CWD monitoring program equivalent to the Kansas program, may apply for the same level of herd status. However, the participating herd shall be assigned the herd status of the herd with the lowest herd status from which the participating herd has obtained any animal.

(d) Each herd that receives any animals from a herd of lesser herd status shall drop to the lowest level of herd status of the animals received. If a participating herd receives any animals of unknown or no herd status, then the herd status of the participating herd shall be reduced to year one. (Authorized by and implementing K.S.A. 2013 Supp. 47-610 and 47-2101; effective Sept. 19, 2014.)

This herd plan shall be approved by the owner, the state APHIS representative, and the commissioner and shall detail how animal movement into and from the CWD-infected herd may occur.

(c) Each domesticated cervid permittee shall notify the commissioner of the death of any animal in a CWD-infected herd. The notice shall be given to the commissioner within 24 hours of the discovery of the animal's death. An approved test shall be administered by a designee of the commissioner to the carcass of each animal in the CWD-infected herd that dies.

(d) If an animal in a CWD-infected herd shows symptomatic or clinical signs of CWD, the domesticated cervid permittee shall notify the commissioner. The animal shall be euthanized and administered an approved test by a designee of the commissioner.

(e) The carcass of each CWD-positive animal shall be disposed of only by a method and at a site approved by the commissioner and the secretary of the Kansas department of health and environment or the secretary's designee.

(f) The quarantine on the CWD-infected herd shall be removed after five consecutive years in which there are no animals in the CWD-infected herd with any clinical signs of CWD and no positive results on an approved test. The owner of a CWD-infected herd may apply to reenroll the herd in the program with a year-five herd status. (Authorized by K.S.A. 2013 Supp. 47-610 and 47-2101; implementing K.S.A. 2013 Supp. 47-610, K.S.A. 47-614, K.S.A. 2013 Supp. 47-622 and 47-2101; effective Sept. 19, 2014.)

Article 4.—DISPOSAL PLANTS

K.A.R. 9-4-1. Definitions. (a) "Commissioner" means the livestock sanitary commissioner of the state of Kansas.

(b) "Inedible meat" means meat and meat products derived from dead, dying, disabled, diseased, or condemned animals, or animals whose meat or meat products are otherwise unsuitable for human consumption, and shall include meat or meat products regardless of origin which have deteriorated so far as to be unfit for human consumption.

(c) "Decharacterization" means the uniform application of sufficient quantities of dye, charcoal, malodorous fish oil, acid or any other agent approved by the commissioner, upon and into freshly slashed flesh, or inedible meat, so as to unequivocally preclude its use in human food. (Authorized by K.S.A. 47-610, 47-1215; effective Jan. 1, 1968.)

K.A.R. 9-4-2. Inedible meats. Inedible meats, (except hides, meat meal, or bone meal, being shipped from a disposal plant) shall be packed in type of container approved by the commissioner. The container so used, shall be clearly marked or stamped with the legend "unfit for human consumption." Lettering used in the legend shall be at least as large as any other lettering on the container, and in no event shall the lettering in the legend, be smaller than one-half inch in height or less than one-half inch in width. Master containers or cartons shall not exceed 100 pounds. (Authorized by K.S.A. 47-610, 47-1215; effective Jan. 1, 1968.)

K.A.R. 9-4-3. Handling of inedible meats; identification and decharacterization. Inedible meats, placed into overnight cooler storage, shall be readily identified as an inedible product, by the direct application of green ink, or by the direct application of charcoal, to the exposed exterior surfaces of the carcasses, or major parts, in sufficient amounts to clearly identify it as an inedible product.

Boned meat shall be ground, or shall be in small pieces not more than four inches in diameter. Boned meat may be processed in pieces larger than four inches in diameter if such pieces are promptly slashed at no more than two-inch intervals, and if an approved denaturing agent is promptly and freely applied to all outside and slashed surfaces.

Application of any denaturing agent to the outside surface of molds, or to outside of blocks, of boned inedible meats shall not be adequate. The denaturing agent shall be mixed intimately with all inedible meats sought to be

denatured. Sufficient denaturant shall be used to give the inedible meats, so distinctive a color, odor, or taste, that it is not susceptible of being confused with any article for human food. (Authorized by K.S.A. 47-610, 47-1215; effective Jan. 1, 1968.)

K.A.R. 9-4-4. Records. Each disposal plant operator shall maintain complete and accurate records as to amount of inedible meats denatured, the amount sold, to whom sold, the address of the consignee, and how and by whom hauled. Such records shall be open to inspection by the commissioner, or his authorized agent, at all times during the normal working hours at such establishment.

Copies of invoices of all sales shall be forwarded to the commissioner, not later than the 10th of each month, covering the previous month's transactions. (Authorized by K.S.A. 47-610, 47-1215; effective Jan. 1, 1968.)

A disposal operator shall register with the commissioner, before he engages in the business of selling inedible meats. This registration shall be in writing. After the disposal plant operator (1) has made application for registration to engage in such activity, and (2) has informed the commissioner where the inedible meats are to be sold, and (3) has had his disposal plant inspected, and (4) such plant has been determined to be adequate to process and handle inedible meats, the commissioner may issue a registration certificate to the applicant. (Authorized by K.S.A. 47-610, 47-1215; effective Jan. 1, 1968.)

(1) "Approved laboratory" means any laboratory designated and approved by the commissioner for performing official *Tritrichomonas foetus* PCR tests.

(2) "Certified negative *Tritrichomonas foetus* bull" means a bull that is individually identified by an official identification method approved by the commissioner and meets one of the following requirements:

(A) Originates from a herd that is not known to be infected and, following at least 14 days of sexual rest before sampling and testing, has had a negative official *Tritrichomonas foetus* PCR test result within the last 60 days, with no subsequent exposure to female bovine; or

(B) originates from a positive *Tritrichomonas foetus* herd but, following at least 14 days of sexual rest before sampling and testing, has had a series of two negative official *Tritrichomonas foetus* PCR test results at intervals of at least 14 days, with the second test occurring within the last 60 days, with no subsequent exposure to female bovine.

(3) "Commissioner" means the animal health commissioner of the Kansas department of agriculture.

(4) "Herd" means a group of both sexually intact male animals and sexually intact female animals under common ownership or control and consisting of all bovines over 12 months of age at the time of commingling that have commingled for any period of time during the last 12 months.

(6) "Official *Tritrichomonas foetus* PCR test" means a polymerase chain reaction test method approved by the commissioner that detects, through in vitro amplification, the presence of *Tritrichomonas foetus* deoxyribonucleic acid (DNA). Each official *Tritrichomonas foetus* PCR test shall be performed only on an animal that is individually identified by an official identification method approved by the commissioner. Each sample shall be collected using a test kit system approved by the commissioner, packaged and transported according to the approved laboratory's protocol for the transport of specimens, and collected by a veterinarian who has completed trichomoniasis training. The herd, or a portion thereof, shall no longer be classified as a positive *Tritrichomonas foetus* herd once any trichomoniasis quarantine has been lifted for the herd or that portion of the herd.

(9) "Trichomoniasis-infected bovine" means a bovine that has tested positive on an official *Tritrichomonas foetus* PCR test.

(10) "Trichomoniasis quarantine" means a movement restriction issued by the commissioner and placed on all cattle in a positive *Tritrichomonas foetus* herd. This restriction shall specify the identity of the animals and the premises to which the animals shall be confined.

(b) Importation of male bovines into Kansas.

(1) Bulls shall not be imported into Kansas from another state unless they go directly to a licensed slaughter plant or an approved Kansas livestock market to be sold for slaughter, or for feeding purposes and then to slaughter, or are accompanied by a completed certificate of veterinary inspection. The certificate of veterinary inspection shall meet the following requirements:

(A) Have been issued within the past 30 days;

(B) state whether, to the veterinarian's knowledge, trichomoniasis has or has not occurred in the herd of origin within the past two years; and

(C) for virgin bulls 18 months of age or younger, have attached to the certificate a statement signed by the veterinarian or owner or owner's representative and indicating that the bulls have not been sexually exposed to breeding-aged females.

(2) With the exception of bulls exempted in paragraph (b)(3), non-virgin bulls, bulls older than 18 months of age, and bulls of unknown virginity status shall not be imported into Kansas from another state for breeding purposes unless these bulls are certified negative *Tritrichomonas foetus* bulls. (c) Importation of female bovines into Kansas. Cows and heifers shall not be imported into Kansas from another state unless the cows and heifers go directly to a licensed slaughter plant or an approved Kansas livestock market to be sold for slaughter, or for feeding purposes and then to slaughter, or are accompanied by a completed certificate of veterinary inspection. The certificate of veterinary inspection shall meet the following requirements:

(1) Have been issued within the past 30 days; and

(2) except for cows or heifers imported into Kansas for a sanctioned rodeo event or a livestock show that will be shown and then returned to the state of origin without being sexually exposed to any bull while in Kansas, document that the cows and heifers meet at least one of the following conditions:

(2) If an individual has a herd management plan to reduce risk of trichomoniasis that has been approved by the commissioner, virgin bulls 24 months of age or younger included within the approved herd management plan shall not be required to be certified negative *Tritrichomonas foetus* bulls when changing ownership in Kansas. However, non-virgin bulls, virgin bulls older than 24 months of age, and bulls of unknown virginity status shall be certified negative *Tritrichomonas foetus* bulls before movement with a change in possession or ownership in Kansas even if these bulls originate from a herd with an approved herd management plan.

(3) Each non-virgin bull, bull older than 18 months of age, and bull of unknown virginity status sold at a livestock market shall be a certified negative *Tritrichomonas foetus* bull, go directly to slaughter, or be purchased for feeding purposes only and then to slaughter.

(e) Trichomoniasis-infected bovines and herds.

(C) All other bulls in a positive *Tritrichomonas foetus* herd shall remain under trichomoniasis quarantine until one of the following conditions is met:

(i) The bulls have been declared certified negative *Tritrichomonas foetus* bulls.

(ii) The bulls are identified with an official positive trichomoniasis infection identification tag and sent directly to slaughter or to public livestock market to be sold for slaughter.

(D) The owner or manager of a positive *Tritrichomonas foetus* herd shall assist the commissioner in determining the destination of all non-virgin bulls and bulls of unknown virginity status sold during the 12 months before the diagnosis of trichomoniasis in the herd.

(A) The female is sold directly to slaughter.

(B) The female is sold or transferred directly to a feedyard for feeding purposes and then to slaughter.

(C) The female is sold through an approved livestock market to be sold for slaughter or for feeding purposes and then to slaughter.

(D) Each bull from the female's herd has been declared a certified negative *Tritrichomonas foetus* bull or has been identified with an official positive trichomoniasis infection identification tag and sent directly to slaughter or to public livestock market to be sold for slaughter, and the female meets one of the following conditions:

(i) Has a calf at side and has had no exposure since parturition to bulls other than bulls that are certified negative *Tritrichomonas foetus* bulls;

(ii) has documented 120 days of sexual isolation, except that breeding by artificial insemination with semen from a certified negative *Tritrichomonas foetus* bull shall be allowed during the isolation period; or

(iii) is determined by a licensed veterinarian to be at least 120 days pregnant.

(E) Regardless of the status of bulls from the positive *Tritrichomonas foetus* herd, the owner or manager of the female obtains a release from trichomoniasis quarantine from the commissioner by providing adequate information and assurances, to the satisfaction of the commissioner, that despite being part of the positive *Tritrichomonas foetus* herd, the female has had no exposure to trichomoniasis.

(6) Unless otherwise allowed by the commissioner, all quarantined bovine females moved from the original premises of trichomoniasis quarantine during the trichomoniasis quarantine period shall be identified with an official positive trichomoniasis infection identification tag.

(7) The owner or manager of a positive *Tritrichomonas foetus* herd shall assist the commissioner in determining the destination of all non-virgin female bovines sold during the 12 months before the diagnosis of trichomoniasis in the herd.

(h) Stray bulls. Any stray bull found on public or private land, from a known or unknown herd of origin, may be confined and placed under a hold order until the bull has one or more official *Tritrichomonas foetus* PCR tests. Each test and the cost of holding the bull shall be the responsibility of the bull's owner. The conditions of the hold or trichomoniasis quarantine order and the number of tests shall be determined by the commissioner.

(i) Neighbor notification. The owner or manager, or both, of a positive *Tritrichomonas foetus* herd shall, within 14 days after lab confirmation of the diagnosis, submit to the commissioner a list of the names and contact information of all known adjacent landowners or land managers. For purposes of this subsection, "adjacent landowners or land managers" shall include all owners and managers of land capable of maintaining livestock susceptible to trichomoniasis whose land is located within the perimeter of the epidemiological study established by the commissioner.

If an owner or manager does not comply with this subsection, the commissioner may assess all administrative costs associated with the notification process against the owner or manager, or both. The public livestock market shall then notify the consignor of such livestock of the infected or exposed animals, which have been placed under such quarantine.

When the veterinary inspector is satisfied that such consignor is prepared to, and is agreeable to holding such animals under quarantine on his own premises, he may permit same to be moved to said premises. When the veterinary inspector is not satisfied that such consignor can comply with the requirements of the quarantine, then the infected or exposed animals shall be placed in quarantine pens provided by the public livestock market operator. If a veterinary inspector finds that livestock consigned to his public livestock market, originated outside the state of Kansas and had not entered the state in line with Kansas requirements, he shall hold such livestock under quarantine in the quarantine pens provided by the public livestock market operator. It shall be the duty of the public livestock market operator to feed, water, and shelter all animals placed under official quarantine on his public livestock market premises.

After the veterinary inspector has diagnosed the disease, with which the animals, including poultry, are infected, or to which they have been exposed, he shall prescribe and administer the necessary medicine, vaccine or serum, and shall submit a statement of the cost of such service, together with the cost of feed, water and care, and such amount shall be charged to the owner or consignor. When livestock is rejected for sale purposes, as provided in this regulation, the veterinary inspector shall issue an official quarantine notice to the consignor covering all livestock in the consignment. The quarantine notice shall be made in triplicate, and the original shall be given to the consignor, the first copy shall be forwarded to the livestock sanitary commissioner at Topeka, Kansas, and the second copy shall be retained by the veterinary inspector. Said quarantine shall be effective for twenty-one days, or until released by the livestock sanitary commissioner, or his authorized representative. K.A.R. 9-10-16. Limitation on sale of injured or physically defective livestock. The veterinary inspector shall have authority to prevent the sale of livestock which are found to have physical defects, produced by injury or disease. In the event that such animals are permitted to be sold, the veterinary inspector's certificate shall state such physical defects or injuries, and the public livestock market operator, or his representative, shall announce such conditions as are shown on the veterinarian's certificate to the prospective purchasers, before such animals are offered for sale. (3) has floors that are constructed in a manner that protects the animals' feet and legs from injury. If the floor is constructed of mesh or slats, the floor shall not allow the animals' feet to pass through any openings in the floor. If any metal strands are used to construct a suspended floor for the primary enclosure, the metal strands shall be ninegauge wire or wire that is greater than ⅛ of an inch in diameter or shall be coated with plastic, fiberglass, or a comparable

material. If any suspended floor is used in a primary enclosure, that floor shall be strong enough that the floor does not sag or bend between structural supports; and

(2) Litter. The licensee shall provide a receptacle in each primary enclosure that contains sufficient clean litter to contain excreta and other body wastes.

(3) Resting surfaces. Each primary enclosure housing cats shall contain one or more elevated resting surfaces that, when added together, are large enough to hold simultaneously all the occupants of the primary enclosure comfortably. Low resting surfaces that do not allow the space under them to be comfortably occupied by the animal shall be counted as part of the floor space.

(d) Additional requirements for dogs. The requirements of this subsection shall be in addition to the requirements in subsections (a), (b), and (e).

(1) Space.

(A) The licensee shall provide a minimum amount of floor space for each dog housed in the primary enclosure, including each weaned puppy housed in a primary enclosure, using the following calculation: the length of the dog or puppy from the tip of the nose to the base of the tail in inches plus six inches, squared, and then divided by 144, shall equal the required minimum floor space in square feet.

excreta, reduce disease hazard, avoid animal contact with excreta, and prevent or eliminate odors, insects, pest, and vermin infestation. If steam or water is used to clean the primary enclosure, whether by hosing, flushing, or other methods, the licensee shall first remove the animals, unless the enclosure is large enough to ensure that the animals will not be harmed, wetted, or distressed in the process.

(b)(1) Each licensee shall clean and sanitize each used primary enclosure and each used food and water receptacle using one of the methods prescribed in paragraph (b)(3) before the primary enclosure or food and water receptacle is used to house, feed, or water another dog, cat, or social grouping of animals.

(2) The licensee shall sanitize all used primary enclosures and food and water receptacles for animals at least once every two weeks using one of the methods prescribed in paragraph (b)(3), and more often if necessary to prevent an accumulation of dirt, debris, food waste, excreta, and other disease hazards.

(3) Each licensee shall sanitize the surfaces of primary enclosures and the food and water receptacles using one of the following methods:

(A) Spraying all surfaces with steam under pressure;

Drinkable water shall be supplied in a sanitary manner and in adequate amounts at intervals suitable for each animal’s species and either continuously accessible to each animal or supplied to maintain the health and well-being of each animal. If water is not continuously accessible, then water shall be provided at least twice daily for at least one hour each time or more often as conditions warrant, unless restricted by written order of the attending veterinarian or not species-appropriate.
